

EDWAR NAZZARIAN

Software Developer | Full-Stack

Available for an 4/8-month internship (S1/S2)

📍 Laval, QC | 📞 514-652-3145 | ✉ Email | 🔗 LinkedIn | 🐙 GitHub

Professional Summary

Software Engineering student at ÉTS with experience in **Full-Stack development**, **REST API design**, and backend development. Hands-on experience with **TypeScript**, **Node.js**, **JavaScript**, **SQL**, and **Jest**, including **performance optimization through in-memory caching**, **error logging**, and automated testing. Strong interest in software optimization, data analysis, and the development of reliable and high-performance software solutions.

Education

Bachelor of Engineering in Software Engineering <i>École de technologie supérieure (ÉTS), Montreal</i>	2025 – Present
University Pathway in Technology (CUT) <i>École de technologie supérieure (ÉTS), Montreal</i>	2024 – 2025
Diploma of College Studies (DEC) in Natural Sciences <i>Cégep Bois-de-Boulogne, Montreal</i>	2021 – 2024

Academic Projects

Learning Management System (SGA) <i>TypeScript, Node.js, Jest, Git, UML, GRASP</i>	2026
--	-------------

- Developed and enhanced a learning management system using an **object-oriented architecture**, including course, questionnaire, and question management.
- Optimized application performance** by implementing an **in-memory cache with TTL expiration** to reduce repeated data access.
- Designed and implemented a **persistent error logging mechanism** to improve traceability, debugging, and system maintainability.
- Developed **automated tests with Jest** to validate caching, error logging, and critical application behaviours.
- Applied **GRASP principles** and UML modelling to define responsibilities and maintain a modular software architecture.

Delivery Platform — Full-Stack Team Project <i>Android Studio, JavaScript, Express.js, MySQL, REST API, Git, Jira</i>	2025
---	-------------

- Designed and developed a delivery platform consisting of Android applications for customers and couriers, as well as a web-based administrative portal.
- Developed backend services and **REST APIs** for managing user accounts, orders, products, stores, and delivery operations.
- Designed the database and implemented **data persistence and exchange mechanisms** between the mobile applications and the web platform.
- Contributed throughout the Agile development lifecycle, including requirements analysis, development, testing, task management with Jira, and version control with Git.

Technical Skills

Languages:	JavaScript, TypeScript, Java, C, SQL
Frontend:	HTML, CSS, React, Responsive Web Design
Backend:	Node.js, Express.js, REST APIs, JWT
Databases:	PostgreSQL, MySQL, MongoDB
Testing / Performance:	Jest, Automated Testing, In-Memory Caching, Performance Optimization, Error Logging
Data Analysis:	Excel, SQL, Power BI (currently learning)
Tools:	Git, GitHub, GitLab, VS Code, IntelliJ IDEA, Maven, Postman
Concepts:	OOP, GRASP, MVC, Full-Stack Architecture, Web Security, UML Design

Professional Experience

Senior Customer Service Clerk — Couche-Tard	2023 – Present
--	-----------------------

- Prepared daily operational reports using PDI Desktop, including verification and monitoring of store data; managed day-to-day store operations, cash handling, and customer service.
