

Edwar Nazzarian

Full-Stack Developer | Web & Mobile Applications

Laval, QC | 514-652-3145 | Email | LinkedIn | GitHub

Overview

Software Engineering student at ÉTS passionate about full-stack development, modern web applications, and cloud technologies. Experienced in building secure APIs, developing modern user interfaces, and deploying applications on Microsoft Azure. Motivated to contribute to real-world software projects in collaborative and agile environments.

Education

Bachelor’s Degree in Software Engineering — ÉTS, Montreal

2025 – Present

Projects

FinTrack — Full-Stack Financial Application

2026

React, Node.js, Express.js, JWT, MongoDB/PostgreSQL

- Developing a financial management web application with user authentication and dynamic dashboards.
- Designed a secure REST API using Node.js, Express.js, and JWT authentication.
- Built a modern React frontend for displaying transactions and financial summaries.
- Planned cloud deployment and CI/CD integration using Docker and Microsoft Azure.

Secure API Platform — Secure Backend System

2026

Node.js, PostgreSQL, Docker, Azure

- Designed and deployed a secure REST API with authentication and protected routes.
- Implemented JWT authentication, request validation, and brute-force protection.
- Containerized the backend using Docker and deployed it on Microsoft Azure.

Administrative Web Platform

2025

JavaScript, PHP, MySQL

- Developed a full-stack web application with responsive user interfaces.
- Implemented backend functionalities and database management using PHP/MySQL.
- Collaborated within a team environment to develop and improve application features.

Bank Management System — Java Application

2025

Java, MVC, OOP

- Designed a software architecture based on MVC and object-oriented programming principles.
- Implemented secure authentication features and improved application performance.

Technical Skills

Languages: JavaScript, Java, C, SQL

Frontend: HTML, CSS, React, responsive web design

Backend: Node.js, Express.js, REST APIs, JWT

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: Microsoft Azure, Docker, GitHub Actions, NGINX, basic Linux

Tools: Git, GitHub, GitLab, VS Code, IntelliJ IDEA, Maven, Postman

Concepts: OOP, MVC, web security, full-stack architecture, testing

Languages

French: Professional proficiency English: Intermediate to advanced proficiency
